Altec Lansing - Bluetooth Speakers, Headphones, and Earbuds

The Altec Lansing inMotion iM600 is an excellent travel companion: not too heavy, built-in long life battery, sturdy, convenient shape once folded. It even has storage for its tiny remote. The sound quality is surprising for such a tiny package. Obviously you can't exactly expect thunderous bass from the 2" speakers, but the sound quality and ...

Although the iM600's battery isn't advertised as being replaceable, the system's manual provides instructions for removing the battery for storage, so if Altec Lansing sells the battery separately...

The prospect of writing a book on loudspeakers is a daunting one, since only a multivolume encyclopedia could truly do justice to the subject. Authors writing about this subject have generally concentrated on their own areas of expertise, often covering their own specific topics in great detail. This book is no exception; the author's background is largely in professional loudspeaker application and specification, and the emphasis in this book is on basic component design, operation, measurement, and system concepts. The book falls largely into two sections; the first (Chapters 1-9) emphasizing the building blocks of the art and the second (Chapters 10-16) emphasizing applications, measurements, and modeling. While a thorough understanding of the book requires a basic knowledge of complex algebra, much of it is understandable through referring to the graphics. Every attempt has been made to keep graphics clear and intuitive. Chapter 1 deals with the basic electro-mechano-acoustical chain between input to the loudspeaker and its useful output, with emphasis on the governing equations and equivalent circuits. Chapter 2 is a survey of cone and dome drivers, the stock-in-trade of the industry. They are discussed in terms of type, design, performance, and perform mance limits. Chapter 3 deals with magnetics. Once a source of difficulty in loudspeaker design, magnetics today yields easily to modeling techniques. Chapter 4 discusses low-frequency (LF) system performance, primarily from the viewpoint of Thiele-Small parameters. We also discuss some of the multi chamber LF systems that became popular during the eighties.

Provides a day-by-day, act-by-act account of the landmark music festival, with details on the pre-festival organization and preparation, interviews and quotes from participants, and discussion of media coverage and the festival's legacy.

A fading rodeo star returns to the family ranch—and finds the spark of love—in this western romance by the New York Times bestselling author. Professional rodeo cowboy “HW” Morgan achieved his dream of competing in the national rodeo finals—but his career came at a price. His twin brother wants nothing to do with him and a string of hookups haven’t warmed his bed. When he loses to a younger competitor, he knows it’s time get his head on straight—and the only place to do that is at home, if his family will have him. Army veteran Samantha Kelly isn’t sure that her visit to Morgan Ranch is a good idea. Struggling to rehab from an injury, she’s willing to give anything a try—even equine therapy. But it doesn’t help that her riding instructor is bold, brash, and distractingly easy on the eyes. As she and HW warily try to work each other out, slowly and surely an unbreakable trust is built—one on which dreams can be built. “If you love cowboys—and who doesn’t—you’ll love the Morgans!”—Cora Seton, New York Times bestselling author

This is the definitive reference for microphones and loudspeakers, your one-stop reference covering in great detail all you could want and need to know about electroacoustics devices (microphones and loudspeakers). Covering both the technology and the practical set up and placement this guide explores and bridges the link between experience and the technology, giving you a better understanding of the tools to use and why, leading to greatly improved results.

Painting the Soul is a beautifully illustrated study of the creation and development of the icon. “This book is a firework display. It sets off scores of explosions which light up the sky over-arching our field, terrain that is normally traversed nose down and too mindful of the footsteps of our predecessors.”—Burlington Magazine

Thoroughly updated for newnbsp;breakthroughs in multimedia nbsp; The internationally bestselling Multimedia: Making it Work has been fully revised and expanded to cover the latest technological advances in multimedia. You will learn to plan and manage multimedia projects, from dynamic CD-ROMs and DVDs to professional websites. Each chapter includes step-by-step instructions, full-color illustrations and screenshots, self-quizzes, and hands-on projects. nbsp;

The first book to introduce computer architecture for security and provide the tools to implement secure computer systems This book provides the fundamentals of computer architecture for security. It covers a wide range of computer hardware, system software and data concepts from a security perspective. It is essential for computer science and security professionals to understand both hardware and software security solutions to survive in the workplace. Examination of memory, CPU architecture and system implementation Discussion of computer buses and a dual-port bus interface Examples cover a board spectrum of hardware and software systems Design and implementation of a patent-pending secure computer system Includes the latest patent-pending technologies in architecture security Placement of computers in a security fulfilled network environment Co-authored by the inventor of the modern Computed Tomography (CT) scanner Provides website for lecture notes, security tools and latest updates

I have physical scars from past surgeries, however, I have emotional scars as well. They were buried deep inside (hidden). It wasn't until my mother died was I able to "catch my breath" and to make sense of or process the emotional pain I had endured due to her prescription drug addiction, resulting in my own addictions.
