The rapid takeoff of the continent-sized national economies and the increasing expense of extraction have led to strong tensions in petrol prices and a race towards alternative driving systems. This book analyses the emergence of a second automobile revolution through the trajectories of automobile firms since the nineties.

China is the largest emerging market in the world, yet Western MNCs have invested significantly less there than their Asian MNC counterparts. Luo systematically compares Western and Asian investment strategies and their performance in the China market and finds lessons that Westerners must heed. He also reviews and analyzes new economic and regulatory environments (e.g., WTO) in China and their potential effect on all foreign investors. Clearly written and readable by anyone reasonably familiar with matters of world trade and investment, the book illustrates its points with case studies drawn from Luo's own research and is difficult to find elsewhere. The result is a needed contribution to the literature on international investment in the China market, primarily for upper level executives and scholars specializing in emerging markets and international business.

~~DIVDIV~~For the first time, four German WWII pilots share their side of the story./divDIV /divDIVFew perspectives epitomize the sheer drama and sacrifice of combat more perfectly than those of the fighter pilots of World War II. As romanticized as any soldier in history, the WWII fighter pilot was viewed as larger than life: a dashing soul waging war amongst the clouds. In the sixty-five-plus years since the Allied victory, stories of these pilots' heroics have never been in short supply. But what about their adversaries—the highly skilled German aviators who pushed the Allies to the very brink of defeat?/divDIV /divDIVOf all of the Luftwaffe's fighter aces, the stories of Walter Krupinski, Adolf Galland, Eduard Neumann, and Wolfgang Falck shine particularly bright. In *The German Aces Speak*, for the first time in any book, these four prominent and influential Luftwaffe fighter pilots reminisce candidly about their service in World War II. Personally interviewed by author and military historian Colin Heaton, they bring the past to life as they tell their stories about the war, their battles, their lives, and, perhaps most importantly, how they felt about serving under the Nazi leadership of Hermann Göring and Adolf Hitler. From thrilling air battles to conflicts on the ground with their own commanders, the aces' memories disclose a side of World War II that has gone largely unseen by the American public: the experience of the German pilot./div/div
