Sociologists divide socialization into two different parts. Primary socialization takes place early in life, as a child and adolescent. Secondary socialization refers to the socialization that takes place throughout one's life, both as a child and as one encounters new groups that require additional socialization.

Childhood Socialization | Introduction to Sociology

Social learning theory defines children's socialization in terms of specific social learning experiences, such as modeling, tuition, and reinforcement, and the cognitions, emotions, and behavior that emerge from these formative experiences. Children's personal reactions were explained historically using personality constructs, such as identification, conditioning, or drive reduction, but are explained contemporaneously in cognitive terms, such as personal agency beliefs and self-regulatory ...

This collection of authoritative studies portrays how the A basic agencies of socialization transform the newborn human organism into a social person capable of interacting with others. Socialization differs from one society to another and within any society from one segment to another. "Childhood Socialization" samples some of that variation, giving the reader a glimpse of socialization in contexts other than those with which he or she is likely to be familiar.

Childhood Socialization - Google Books

Abstract. This chapter examines the development and operation of socialization in the lives of children and adolescents, with a focus on the mechanisms and consequences of socialization. Consideration is given to theoretical perspectives on (a) how children and adolescents learn social roles, (b) the role of agency in social development, (c) the social contexts in which socialization occurs, (d) socialization over the life course, and (e) how socio-historical change influences the ...
