The purpose of this workbook is to facilitate student's understanding of the DSM IV and other texts related to the diagnoses of mental disorders. It is designed to enhance the student's ability to assess clients' strengths and to diagnose any emotional difficulties the client may be experiencing. It will provide students with the opportunity to practice their assessment skills in a classroom environment prior to entering the field as a mental health professional. Students will not only learn the various diagnostic categories of the DSM IV but also how to apply these categories to clients they will be seeing in practice. It will aid students in understanding dual diagnoses, symptom formulation, and the overlap between diagnostic categories.

This revolutionary, user-friendly textbook not only guides social workers in developing competence in the DSM system of diagnosis, it also assists them in staying attuned during client assessment to social work values and principles: a focus on client strengths, concern for the worth and dignity of individuals, appreciation of environmental influences on behavior, and commitment to evidence-informed practice. The authors, seasoned practitioner-scholars, provide an in-depth exploration of fourteen major mental disorders that social workers commonly see in practice, including anxiety disorders, depression, bipolar disorder, and schizophrenia. They skillfully integrate several perspectives in order to help practitioners meet the challenges they will face in client assessment. A risk and resilience framework helps social workers understand environmental influences on the emergence of mental disorders and the strengths that clients already possess. Social workers will also learn to apply critical thinking to the DSM when it is inconsistent with social work values and principles. Finally, the authors catalog the latest evidence-based assessment instruments and treatments for each disorder so that social workers can intervene efficiently and effectively, using the best resources available. Students and practitioners alike will appreciate the wealth of case examples, evidence-based assessment instruments, treatment plans, and new social diversity sections that make this an essential guide to the assessment and diagnostic processes in social work practice.

Few books written for practitioners provide any practical information regarding grief and loss issues with children and adolescents. In a clear and concise manner, *Children and Loss: A Practical Handbook for Professionals* details the strengths perspective of grief and loss developed by the editors. It discusses grief and loss in relation to individual children while also addressing issues and strategies for families and professional teams. The handbook specifically focuses on the dynamics of grief and assessment issues and provides in-depth case examples. This realistic and usable application of essential techniques and resources will immediately enhance practitioners' skills with children and adolescents in specific settings where children are most likely to present with grief and loss issues. This book is a great resource for all practitioners who work with children, from foster care professionals and therapists specializing in divorce to counselors in schools and churches. This book can also be used to academic settings for any course related to child development, child psychology, children and families, grief and loss, end of life, and death.

Written for social workers by a social worker, *Mental Disorders, Medications, and Clinical Social Work* discusses the etiology, epidemiology, assessment, and intervention planning for common mental disorders. Looking at disorders from an ecosystems perspective, Austrian goes beyond a linear classification approach and DSM-IV-TR categories and encourages social workers to analyze the internal and external environmental factors that contribute to a disorder's development. Austrian's discussion of effective intervention(s) for a particular client also stresses the importance of working with families in treating disorders. In addition to information on new medications, biochemical data on the causes of disease, and diagnostic tests, the revised third edition discusses therapies such as motivational interviewing, cognitive-behavioral, interpersonal, and dialectic.

With clarity and eloquence, *Trauma and Grief Assessment and Intervention* comprehensively captures the nuance and complexity involved in counseling bereaved and traumatically bereaved persons in all stages of the life cycle. Integrating the various models of grief with the authors' strengths-based framework of grief and loss, chapters combine the latest research in evidence-based practice with expertise derived from years of psychotherapy with grieving individuals. The book walks readers through the main theories of grief counseling, from rapport building to assessment to intervention. Each chapter concludes with lengthy case scenarios that closely resemble actual counseling sessions to help readers apply their understanding of the chapter's content. In the support material on the book's website, instructors will find a sample syllabus, PowerPoint slides, and lists of resources that can be used as student assignments or to enhance classroom learning. *Trauma and Grief Assessment and Intervention* equips students with the knowledge and skills they need to work effectively with clients experiencing trauma and loss.

First published in 2002. Routledge is an imprint of Taylor & Francis, an informa company.

Featuring an evidence- and strengths-based approach to practice methods, this new text teaches students how to apply social work skills in a variety of settings. Designed to enhance self-awareness, professionalism, ethical reasoning, cultural sensitivity, and an appreciation for social justice issues, this text introduces readers to social work's core values and practice methods to help them assimilate the skills needed for working in the field. Cases and skills-based exercises demonstrate how to make accurate assessments and design effective intervention plans. After laying the groundwork in theory, values, and ethics, the authors review methods for working with individuals, children, and families from an individual and environmental strengths-based perspective. Client engagement, assessment, intervention, evaluation and termination, and documentation are then reviewed. Readers are introduced to the foundational concepts of social work practice and through application learn to successfully work with clients. Key Features Integrates the Council on Social Work Education's EPAS standards and core competencies throughout, including engagement, assessment, intervention, evaluation, social justice, ethics, critical thinking, professional conduct and decision making, and cultural competency and diversity. Case scenarios in client interview format that closely resemble actual interactions, followed by questions, test readers' understanding of the practice skills needed to work in the field. Skill-building exercises including individual and group activities, role plays, simulations, and discussion questions that provide an opportunity to apply one's knowledge and skill sets. Personal reflections that encourage students to examine their own beliefs to help them assimilate social work ethics and values into their professional demeanor. Icons throughout the text that draw attention to useful tips for developing direct practice skills. A strengths-based approach that heightens understanding and results in a higher level of proficiency in the change process. Introduces challenging situations often encountered in practice to help readers acquire the more advanced practice skills necessary for assessment and intervention. Resources including PowerPoints, test questions, sample syllabi, and suggested answers to text exercises and discussion questions.
