Wind, Hydrogen and Battery Backup Systems. Unlike most other books written on the subject, THE ELECTRICIAN'S GREEN HANDBOOK, will provide your students with an understanding of these systems from an installation and maintenance point of view. Discussed in detail are the circuit configurations of stand-alone inverters, string inverters, central inverters, micro-inverters and rectifiers, the key components of any alternative energy installation used today. The National Electrical Code (NEC) 2011 is used throughout the text and systems are taken apart and the NEC 2011 is examined for each part of the systems. Monitoring the output of alternative energy systems is not only required for maximum efficiency, it is essential. This book covers the components, systems and topologies for monitoring the system functions and performance and is a must for the journeyman electrician and electrical students of all levels.
