Earth science is the study of planet Earth. It covers all aspects of the planet from the deep inner core to the outer layers of the atmosphere. There are many fields of science that are part of Earth science including geology (rocks and minerals), paleontology (dinosaurs and fossils), meteorology (atmosphere and the weather), and oceanography just to name a few.

Printable SCIENCE Worksheets and Study Guides. SCIENCE is a way of learning about what is in the natural world, how the natural world works, and how the natural world became to be the way it is. Science relies on testing ideas with evidence gathered from the natural world. Science can lead to technological advances, as well as helping us learn about enormously important and useful topics, such as our health, the environment, and natural hazards.
