We spoke to Professor Ismail M. Sebetan, Director of the Forensic Sciences Program at National University to get some answers. "Forensic serology is the branch of forensic sciences dealing with identification and characterization of biological, evidentiary samples — such as blood, semen, saliva, sweat, breast milk and any other bodily fluids," says Professor Sebetan.

What Is Forensic Serology? | National University

- Serology = the study of antigen-antibody reactions.
- Blood typing (A,B,O) is the most common lab test run.
- You need just 2 antisera to test for blood type.
- Type A clots with anti-A serum, Type B clots with anti-B serum
- Type AB clots when anti-A and anti-B are both present
- Type O will not clot with either or both sera.
