Physics and Chemistry of Ice is an authoritative summary of state-of the-art research contributions from the world's leading scientists. A key selection of submissions from to the 11th International Conference on the Physics and Chemistry of Ice, 2006 are presented here with a foreword by Werner F. Kuhs. An invaluable resource, this book provides researchers and professionals with up-to-date coverage on a wide range of areas in ice science including: "Spectroscopic and diffraction studies "Molecular dynamics simulations "Studies of ice mechanics "Quantum mechanical ab initio calculations "Ice and hydrate crystal growth and inhibition studies "Bulk and surface properties of ice and gas hydrates "Snow physics and chemistry This insight into topical aspects of ice research is a key point of reference for physicists, chemists, glaciologists, cryo-biologists and professionals working in the fields of ice and hydrogen bonding. The Editor Werner F. Kuhs is a Professor of Crystallography at the University of G'ttingen, Germany and has a career spanning 25 years of research in the field of water ices and gas hydrates using diffraction methods, neutron and Raman spectroscopy, scanning electron microscopy, atomic force and molecular dynamics simulations. He was the Chair of the 11th International Conference on the Physics and Chemistry of Ice."

This book has been written by practicing clinicians and researchers who are closely involved with individuals who have disorders of communication. The first section provides an overview of basic issues and terminology in clinical linguistics; the second section discusses the purpose and value of assessing specific aspects of an individual' s linguistic ability and evaluates mainstream linguistic assessment procedures. The third section reviews the impact that modern linguistics is having on clinical intervention. For this 2nd edition, the book has been updated to take into account recent research developments and there is a new chapter on the assessment of speech perception.
