Revivez la passionnante épopée de la plus japonaise des consoles. Des centaines d'anecdotes, l'histoire de RED, de NEC, de Sodipeng et l'intégrale des jeux CD-ROM vous attendent dans cette encyclopédie unique au monde.

An in-depth exploration of a neglected video game platform of the 1990s and a reflection on the way we construct the cultural history of video games. In The Media Snatcher, Carl Therrien offers an in-depth exploration of NEC's PC Engine/TurboGrafx-16, a little-studied video game platform released in the late 1980s. The PC Engine was designed to bring technological

expandability to the world of game consoles; The Media Snatcher's subtitle evokes some of the expansions and the numerous rebranded versions of the system released by NEC, including the first CD-ROM add-on in video game history. The platform makers hoped that expandability would allow its console to remain at the cutting edge and even catch up with such perceptually rich media as cinema and anime. More than a simple shape-shifter, the PC Engine became a media snatcher. Therrien examines the multidirectional interactions of video game technologies, commercial structures, and cultural dynamics. He considers, among other things, hyperbolic marketing and its impact on how we construct video game history; glitches, technological obsolescence, and the difficulty of conducting media archaeology of the recent past; the emergence of male-centered power fantasies through audiovisual rewards; the rise of original genres such as visual novels; and the sustained efforts to integrate PC Engine software in the sprawling media landscape of Japan (where the PC Engine found much of its success). Avoiding the usual techno-industrial glorification, Therrien recounts the bold technological aspirations of the platform makers and the struggles to make the actual technology realize its potential.

This NIV Value Outreach Bible is a low-cost softcover Bible perfect for churches and ministries buying in bulk to present to first-time Bible readers.

CMJ New Music Report is the primary source for exclusive charts of non-commercial and college radio airplay and independent and trend-forward retail sales. CMJ's trade publication, compiles playlists for college and non-commercial stations; often a prelude to larger success.

The #1 New York Times bestselling Wings of Fire series soars to new heights in the fourth graphic novel adaptation! In the shadows, trouble is brewing . . .When Starflight is stolen by his own tribe, he hopes to at least discover some of the long-held NightWing secrets -- what magical powers they really have, who they're allied with in the war, and where they've been living all this time.But the truth about Starflight's tribe is more terrible than he ever imagined: Not only do the NightWings live in a dark, miserable place, but they've imprisoned several innocent RainWings there, too. Stranded and alone, Starflight only wants to get back to his friends. But the fate of two kingdoms now rests in his talons, and with no one to save him, Starflight will have to find a way to be brave . . . before it's too late.

Class-tested and coherent, this textbook teaches classical and web information retrieval, including web search and the related areas of text classification and text clustering from basic concepts. It gives an up-to-date treatment of all aspects of the design and implementation of systems for gathering, indexing, and searching documents; methods for evaluating systems; and an introduction to the use of machine learning methods on text collections. All the important ideas are explained using examples and figures, making it perfect for introductory courses in information retrieval for advanced undergraduates and graduate students in

computer science. Based on feedback from extensive classroom experience, the book has been carefully structured in order to make teaching more natural and effective. Slides and additional exercises (with solutions for lecturers) are also available through the book's supporting website to help course instructors prepare their lectures.
