Blanchard presents a unified and global view of macroeconomics, enabling students to see the connections between the short-run, medium-run, and long-run. From the major economic crisis to the budget deficits of the United States, the detailed boxes in this text have been updated to convey the life of macroeconomics today and reinforce the lessons from the models, making them more concrete and easier to grasp.

"For intermediate courses in economics." A Unified View of the Latest Macroeconomic Events In " Macroeconomics, " Blanchard presents a unified, global view of macroeconomics, enabling readers to see the connections between goods, financial markets, and labor markets worldwide. Organized into two parts, the text contains a core section that focuses on short-, medium-, and long-run markets and three major extensions that offer more in-depth coverage of the issues at hand. From the major economic crisis and monetary policy in the United States, to the problems of the Euro area and growth in China, the text helps readers make sense not only of current macroeconomic events but also of events that may unfold in the future. Integrated, detailed boxes in the Seventh Edition have been updated to convey the life of macroeconomics today; reinforce lessons from the models; and help readers employ and develop their analytical and evaluative skills. Also Available with MyEconLab (r) MyEconLab is an online homework, tutorial, and assessment program designed to work with this text to engage students and improve results. Within its structured environment, students practice what they learn, test their understanding, and pursue a personalized study plan that helps them better absorb course material and understand difficult concepts. Note: You are purchasing a standalone product, MyEconLab does not come packaged with this content. Students, if interested in purchasing this title with MyEconLab, ask your instructor for the correct package ISBN and Course ID. Instructors, contact your Pearson representative for more information. For intermediate courses in economics. In Macroeconomics, Blanchard presents an integrated, global view of macroeconomics, enabling students to see the connections between goods markets, financial markets, and labor markets worldwide. A unified view of the latest macroeconomic events In Macroeconomics, Blanchard presents an integrated, global view of macroeconomics, enabling students to see the connections between goods markets, financial markets, and labor markets worldwide. Organized into two parts, the text contains a core section that focuses on short-, medium-, and long-run markets and two major extensions that offer more in-depth coverage of the issues at hand. From the major economic crisis that engulfed the world in the late 2000s, to monetary policy in the US, to the problems of the Euro area, and growth in China, the text helps students make sense not only of current macroeconomic events but also of those that may unfold in the future. Integrated, detailed boxes in the 8th Edition have been updated to convey the life of macroeconomics today, reinforce lessons from the models, and help students employ and develop their analytical and evaluative skills.

Leading economists consider the shape of future economic policy: will it resume the pre-crisis consensus, or contend with the post-crisis "new normal"? What will economic policy look like once the global financial crisis is finally over? Will it resume the pre-crisis consensus, or will it be forced to contend with a post-crisis "new normal"? Have we made progress in addressing these issues, or does confusion remain? In April of 2015, the International Monetary Fund gathered leading economists, both academics and policymakers, to address the shape of future macroeconomic policy. This book is the result, with prominent figures—including Ben Bernanke, John Taylor, and Paul Volcker—offering essays that address topics that range from the measurement of systemic risk to foreign exchange intervention. The chapters address whether we have entered a "new normal" of low growth, negative real rates, and deflationary pressures, with contributors taking opposing views; whether new financial regulation has stemmed systemic risk; the effectiveness of macro prudential tools; monetary policy, the choice of inflation targets, and the responsibilities of central banks; fiscal policy, stimulus, and debt stabilization; the volatility of capital flows; and the international monetary and financial system, including the role of international policy coordination. In light of these discussions, is there progress or confusion regarding the future of macroeconomic policy? In the final chapter, volume editor Olivier Blanchard answers: both. Many lessons have been learned; but, as the chapters of the book reveal, there is no clear agreement on several key issues. Contributors Viral V. Acharya, Anat R. Admati, Zeti Akhtar Aziz, Ben Bernanke, Olivier Blanchard, Marco Buti, Ricardo J. Caballero, Agustín Carstens, Jaime Caruana, J. Bradford DeLong, Martin Feldstein, Vitor Gaspar, John Geanakoplos, Philipp Hildebrand, Gill Marcus, Maurice Obstfeld, Luz Awazu Pereira da Silva, Rafael Portillo, Raghuram Rajan, Kenneth Rogoff, Robert E. Rubin, Lawrence H. Summers, Hyun Song Shin, Lars E. O. Svensson, John B. Taylor, Paul Tucker, José Viñals, Paul A. Volcker

The thirty-first edition of the NBER Macroeconomics Annual features theoretical and empirical research on central issues in contemporary macroeconomics. The first two papers are rigorous and data-driven analyses of the European financial crisis. The third paper introduces a new set of facts about economic growth and financial ratios as well as a new macrofinancial database for the study of historical financial booms and busts. The fourth paper studies the historical effects of Federal Reserve efforts to provide guidance about the future path of the funds rate. The fifth paper explores the distinctions between models of price setting and associated nominal frictions using data on price setting behavior. The sixth paper considers the possibility that the economy displays nonlinear dynamics that lead to cycles rather than long-term convergence to a steady state. The volume also includes a short paper on the decline in the rate of global economic growth.

Prominent economists reconsider the fundamentals of economic policy for a post-crisis world. In 2011, the International Monetary Fund invited prominent economists and economic policymakers to consider the brave new world of the post-crisis global economy. The result is a book that captures the state of macroeconomic thinking at a transformational moment. The crisis and the weak recovery that has followed raise fundamental questions concerning macroeconomics and economic policy. These top economists discuss future directions for monetary policy, fiscal policy, financial regulation, capital-account management, growth strategies, the international monetary system, and the economic models that should underpin thinking about critical policy choices. Contributors Olivier Blanchard, Ricardo Caballero, Charles Collins, Arminio Fraga, Már Guðmundsson, Sri Mulyani Indrawati, Omar Issing, Olivier Jeanne, Rakesh Mohan, Maurice Obstfeld, José Antonio Ocampo, Guillermo Ortiz, Y. V. Reddy, Dani Rodrik, David Romer, Paul Romer, Andrew Sheng, Hyun Song Shin, Parthasarathi Shome, Robert Solow, Michael Spence, Joseph Stiglitz, Adair Turner
