The Chieftain was the British Army's Main Battle Tank for twenty years, first

entering service with the 11th Hussars in 1966. One of the first true Main Battle Tanks, it was designed to replace both medium (Centurion) and heavy (Conqueror) tanks in front line service and provided the backbone of the British Army's heavy armour at the height of the Cold War. It incorporated

a lot of revolutionary design features, although some did not work as well as expected. For example, in order to reduce height the driver lay in a reclining position and changed gear with his foot. The L11 120mm gun used a self-combusting bagged charge instead of a brass cartridge case (the
