New Frontiers is the first book of the Expansion Wars Trilogy, an all-new adventure in the Black Fleet universe.

The Phage War had been a devastating conflict for the Terran Confederacy. Even with the destruction of their terrifying, implacable foe, humanity is still reeling. Political alliances are crumbling and their mighty fleet is in tatters. There is nothing to celebrate, even after such a complete victory. They soon learn that there are other stellar neighbors ... and they've been watching the conflict with great interest. One species comes with an offer of friendship and alliance, but humanity is weary and distrustful, their only interactions with aliens having resulted in the near-eradication of their kind. Before the ashes of war have been fully swept away Captain Celesta Wright is dispatched to the Frontier with a small taskforce to investigate a mysterious signal while the Confederacy struggles to hold itself together. A partnership with this new species could help accelerate the recovery effort, but is the offer too good to be true? Can humanity risk another fight with an advanced alien species right on the heels of the bloodiest war that had ever been waged? New Frontiers is the first book of the Expansion Wars Trilogy, an all adventure in the Black Fleet universe.

The Black Fleet Saga continues... A human planet has been invaded. The enigmatic Darshik have landed troops on a frontier world and have begun subduing major cities even as their blockade repels all attempts by the fledgling United Terran Federation to mount a counteroffensive. The Federation's military command is desperate and with their fleet still in tatters they make a last ditch effort to free the planet: They pull Captain Jackson Wolfe out of retirement and put him in command of a ship they hope can get past the defending armada and provide support to the beleaguered Marines and civilians fighting on the surface of the contested world. There is no reasoning with this enemy. If the Terran Federation wants their planet back, they will have to pay the price. Iron & Blood is the second book of The Expansion Wars Trilogy and the fifth book of the Black Fleet Saga.

A relentless enemy... An old wolf's last hunt... The future of two species hanging in the balance... The Darshik war machine is flagging, but the war is far from over. Even as an exhausted Federation military tenses up for a counterattack after repelling the last Darshik invasion, reports are coming in of a new, more powerful class of ship that's striking deep into Terran space. Captain Jackson Wolfe has been given the fleet's newest, most advanced destroyer and tasked with eliminating this new threat before it can claim any more human lives. What he finds, however, is immeasurably more dangerous than just some new class of starship ... it's a horror that could lead to the destruction of both their species if it isn't stopped. Destroyer is the third book in the Expansion Wars Trilogy and part of the #1 bestselling Black Fleet Saga.

Humanity is fractured and on the brink of war...The United Terran Federation and the Eastern Star Alliance have been fighting in minor skirmishes along the border region for the last few years, but now it threatens to break out into a full-on war with the victor assuming control of all human space.The Alliance has fired the opening shots with a horrific strike on a civilian target, killing millions and shocking the Federation's parliament into action. Now mighty fleets of starships are moving against each other, ready for the final battle that will settle the conflict once and for all. The venerable Admiral Jackson Wolfe prepares himself for one last fight as his nemesis, Admiral Vadim Kohl, looks to make a name for himself by defeating the infamous Federation officer in battle. Jackson knows events are now in motion that can't be stopped and only one thing is certain: win or lose, nothing will ever be the same again.

From Joshua Dalzelle, author of the bestselling "Omega Force" series, comes an all new vision of humanity's future. In the 25th century humans have conquered space. The advent of faster-than-light travel has opened up hundreds of habitable planets for colonization, and humans have exploited the virtually limitless space and resources for hundreds of years with impunity. So complacent have they become with the overabundance that armed conflict is a thing of the past, and their machines of war are obsolete and decrepit. What would happen if they were suddenly threatened by a terrifying new enemy? Would humanity fold and surrender, or would they return to their evolutionary roots and meet force with force? One ship-and one captain-will soon be faced with this very choice. Against incredible odds, Jackson Wolfe is determined to save humanity-and in the process, might end up saving himself.

From Joshua Dalzelle comes the follow up to the #1 Bestseller "Warship." Captain Jackson Wolfe survived the initial incursion of a vicious alien species into human space ... barely. He had assumed the juggernaut that had devastated three Terran systems was the herald for a full invasion, but for the last

few years it has been eerily quiet along the Frontier. Jackson now struggles to convince the Confederate leadership the threat is still imminent and needs to be taken seriously. While powerful factions make backroom deals he is desperate to find irrefutable proof that the invaders are coming and if humanity expects to survive they must marshal their forces and make a stand before it's too late.

It's the year 2277. For fifty years, Earth has received mysterious data transmissions from random locations in deep space. The streams include advanced technology, allowing Humans to achieve faster-than-light travel virtually overnight. As we prepare to take our first, tentative steps into interstellar space, we know almost nothing about our alien benefactors, and their motivations remain unexplained. While completing their shakedown cruise, Captain Tom Prescott and the crew of the first Terran Fleet Command starship, TFS Ingenuity, stumble into a first contact situation. They learn that Earth is not the first civilization granted access to the stars before their time - and how this Faustian gift has inevitably led to centuries of interstellar war. Humanity's existence hangs in the balance as a powerful alliance assembles a preemptive military strike, believing it to be their only option to protect themselves ... from us. Prescott and his small, initially unarmed starship must serve as our only line of defense. Ingenuity is our only hope. _____ TFS INGENUITY is the first book of the Terran Fleet Command Saga by author Tori Harris. The story is typically associated with the military science fiction, space exploration science fiction, colonization, first contact, genetic engineering, space opera technothriller, galactic empire, or alien invasion categories.

Captain Jackson Wolfe never thought he'd see the end of the Phage War in his lifetime. The enemy was too powerful, too numerous, and utterly determined to exterminate humanity. But the appearance of a new ally in the fight has changed all of that. For the first time since the original incursion Wolfe thinks that maybe there's a chance to stop their implacable enemy before they have the chance to wipe out any more human planets. That opportunity comes at great cost, however, and even as he makes plans for their first offensive move on the Phage, Jackson is all too aware that most of them will not survive. "Counterstrike" is book three of the bestselling Black Fleet Trilogy.

Two centuries have passed since thermonuclear war devastated the Earth. Miracle breakthroughs by Striker Industries reclaimed Earth and brought colonization to the solar system. Meanwhile, unexplained disappearances and tragic accidents point to a darker intent by Striker. Admiral Nicholas Dante suspects a plot against the Earth Alliance, but without evidence and few to trust, his only hope is family. Kate Dante, accused traitor to Earth, now undercover on Mars, is also investigating a case of missing ships and their crews when her brother Michael arrives with a mission of his own, putting them both in peril.

Now her hope is to survive long enough to complete her mission, save her brother, and return him to their lunatic father as events threaten to overwhelm them all. No one is more aware of that horror than Kristin Dante, first officer of the starship Bonaventure. Responding to a distress call, Kristin and her crew discover firsthand the horror that will soon be on the Alliance doorstep. Caught in a struggle against the odds, their only chance is to put old family rivalries and issues behind them. The Dantes' find themselves at the forefront of a war for survival against an evil alien threat. But will years of dysfunctional family history be the end of us all?

If you could be the first to lay eyes upon a planet orbiting a distant star, would you go? If it meant that when you returned home-if you returned home-everyone you knew would have been dead for centuries, would you still go? The members of the Polaris Project knew what they were giving up when they volunteered to fly to the star named Angel-21, but the allure of being the first explorers to leave the Solar System far outweighed the risks. As it turned out, the most dangerous thing they faced wasn't the mission ... it was the homecoming. Eight hundred years have passed and Earth is nothing like they thought it would be. As Commander Markus Brentwood scrambles to uncover the mystery of what's happened to Earth in their absence, he also must contend with an increasingly dysfunctional crew and a damaged ship that's flying on borrowed time. What should have been a joyous return home after a long, hard mission has turned into a race to see which nightmare would kill them first. Blueshift is an all new sci-fi adventure from Joshua Dalzelle, author of the bestselling Omega Force Series and Black Fleet Saga.
