ethics is a guide for “carrying out nursing responsibilities in a manner consistent with quality in nursing care and the ethical obligations of the profession.” Ethics, in general, are the moral principles that dictate how a person will conduct themselves.

*What is the Nursing Code of Ethics? |
Nurse.org*

Much attention has been paid to the role of the nurse in recognizing and addressing ethical dilemmas. There has been less emphasis, however, on the issue of whether or not nurses understand the ethical nature of everyday practice.

Awareness of the inherently ethical nature of practice is a component of nurse ethical sensitivity, which has been identified as a component of ethical decision-making.

*Nurse's Code of Professional Conduct |
Work - Chron.com*

Normally, professional responsibility in nursing is assigned. This means that nurses are instructed on what roles they are to perform, what they should be in charge of, and who they should report to. The nature of responsibility in nursing is that it is assigned, rather than an individual allocating for tasks themselves.

*Professional Accountability and
