Gain a common-sense approach to the practice of intellectual property law. The authors, both experienced IP attorneys, share their knowledge in a comprehensive yet practical guide. They explain the fundamentals of all major areas of IP law and how to handle the most common situations in patent, trademark, and copyright cases. It is an invaluable resource for those newer to the practice as well as offering a basic understanding of IP law for those outside the area.

This text provides guidance on all aspects of UK patent law and litigation practice.

Written by a team of lawyers with long-standing experience in patent litigation in Europe, this book is a comprehensive and practical guide to European patent law, highlighting the areas of consistency and difference between the most influential European patent law jurisdictions: the European Patent Office (EPO), England & Wales, France, Germany and the Netherlands. It is frequently the case that the decisions and approaches of these courts are cited by European patent lawyers of all jurisdictions when submitting arguments in their own national courts. The book is therefore intended to provide a guide to patent lawyers acting in the national European courts today. The book also looks to the future, by addressing all the areas of patent law for which the proposed Unified Patent Court (UPC) will need to establish a common approach. Uniquely, the book addresses European patent law by subject matter area, assessing the key national and EPO approaches together rather than in nation-by-nation chapters; and provides an outline in each chapter of the common ground between the national approaches, as a guide for the possible application of European patent law in the UPC.

Trials before the Patent Trial and Appeal Board (PTAB) are a hybrid of conventional patent prosecution and patent litigation practices. Successfully navigating a PTAB trial may entail tasks ranging from analyzing highly technical prior art to deposing scientific experts, drafting patent-claim amendments, and arguing at an oral hearing before an expert panel. The authors, all experienced litigators who have handled several hundred PTAB proceedings, explain the PTAB statutes and rules, including recent updates and rule changes, along with lessons learned from the growing body of Federal Circuit case law reviewing final PTAB decisions. They include strategic guidance on litigating these cases along with a description of a PTAB trial from petition preparation to appeals to the Court of Appeals for the Federal Circuit.

The only single-volume guide to the major components of intellectual property published by the American Bar Association. Written by intellectual property and franchise lawyers, this resource provides substantive and practical guidance to a wide audience of non-IP specialists.

This significantly updated second edition of the Research Handbook on Patent Law provides comprehensive coverage of new research for patent protection in three major jurisdictions: the United States, Europe and Japan.
