former Traffic Commissioner of New York City, Sam Schwartz a.k.a. "Gridlock Sam," one of the most respected transportation engineers in the world and consummate insider in NYC political circles, uncovers how American cities became so beholden to cars and why the current shift away from that trend will forever alter America's urban landscapes, marking nothing short of a revolution in how we get from place to place. This isn't a consequence of higher gas prices, or even the economic downturn, but rather a collective decision to be a lot less dependent on cars—and if American cities want to keep their younger populations, they need to plan accordingly. In Street Smart, Sam Schwartz explains how. In this clear and erudite presentation of the principles of smart transportation and sustainable urban planning—from the simplest cobblestoned street to the brave new world of driverless cars and trains—Sam Schwartz combines

Even the most creative minds need stimulation.

Inspiration can come from examples of exceptional work, exercises designed to motivate, or time to reflect. The more inventive pieces the mind takes in, the more resources it has to draw from. Street Smart Advertising: How to Win the Battle of the Buzz contains countless examples designed to jump-start the right side of the brain. Margo Berman's book is packed with memorable uses of new media, exciting on-strategy marketing, creative online work, and insightful quotes

by giants in the advertising industry. She offers innovative techniques to generate 'sticky' slogans and headlines, easy-to-apply copywriting tips, and practical revision strategies. Berman has updated the book to reflect how online media has changed its approach from 'pushing' information to the audience to 'pulling' - i.e., engaging the audience in a brand. By using social networking groups like Facebook and Twitter, the author points out, even small companies can have a giant digital footprint by leveraging their online presence, offering relevant

insights, and stimulating consumer-created content. In tough economic times, Berman says, savvy advertisers don't need huge budgets to engage the audience and create forums for them to share ideas. The biggest change in marketing is reaching people through new touch points: through audience intersection, viral marketing, and online dialogues. As Street Smart Advertising makes clear, those who become victorious in this new marketing arena will win the battle of the buzz.

The country's leading transport expert describes how the driverless vehicle revolution will transform highways, cities, workplaces and laws not just here, but across the globe. Our time at the wheel is done.

Driving will become illegal, as human drivers will be demonstrably more dangerous than cars that pilot themselves. Is this an impossible future, or a revolution just around the corner? Sam Schwartz, America's most celebrated transportation guru, describes in this book the revolution in self-driving cars. The ramifications will be dramatic, and the

transition will be far from seamless. It will overturn the job market for the one in seven Americans who work in the trucking industry. It will cause us to grapple with new ethical dilemmas—if a car will hit a person or a building, endangering the lives of its passengers, who will decide what it does? It will further erode our privacy, since the vehicle can relay our location at any moment. And, like every other computer-controlled device, it can be vulnerable to hacking. Right now, every major car maker here and abroad is working on bringing autonomous vehicles to consumers. The fleets are

getting ready to roll and nothing will ever be the same, and this book shows us what the future has in store.

New York has appeared in more movies than Michael Caine, and the resulting overfamiliarity to moviegoers poses a problem for critics and filmmakers alike. Audiences often mistake the New York image of skyscrapers and bright lights for the real thing, when in fact the City is a network of clearly defined villages, each with a unique personality. Standard film depictions of New Yorkers as a rush-hour mass of

undifferentiated humanity obscure the connections formed between people and places in the City's diverse neighborhoods. Street Smart examines the cultural influences of New York's neighborhoods on the work of four quintessentially New York filmmakers: Sidney Lumet, Woody Allen, Martin Scorsese, and Spike Lee. The City's heterogeneous economic and ethnic districts, where people live, work, shop, worship, and go to school, often bear little relation to the image of New York City created by the movies. To these directors, their home city is as tangible as the smell

of fried onions in the stairwell of an apartment building, and it is this New York, not the bustling, glittery illusion portrayed in earlier films, that shapes their sensibilities and receives expression in their films. Richard A. Blake shows how the Jewish enclaves on Manhattan's Lower East Side profoundly influence Sidney Lumet's most noted characters as they struggle to form and maintain their identities under challenging circumstances. Both Woody Allen's light comedies and his more serious cinematic fare reflect the director's origins in the Flatbush

neighborhood in Brooklyn and the displacement he felt after relocating to Manhattan. Martin Scorsese's upbringing on Elizabeth Street in Manhattan's Little Italy resonates in his gritty portraits of urban modernity. Blake also looks at the films of Spike Lee, whose adolescence in Fort Greene, a socioeconomically diverse Brooklyn neighborhood, exposed him to widely ranging views that add depth to his complicated treatises on power, culture, and race. Lumet, Allen, Scorsese, and Lee's individual identities were shaped by their neighborhoods, and in turn,

their life experiences have shaped their artistic vision. In Street Smart, Richard A. Blake examines the critical influence of "place" on the films of four of America's most accomplished contemporary filmmakers.

The poor health of today's roads--a subject close to the hearts of motorists, taxpayers, and government treasurers around the world--has resulted from faulty incentives that misdirect government decision-makers, according to the contributors to Street Smart. During the 1990s, bad government

decision-making resulted in the U.S. Interstate Highway System growing by only one seventh the rate of traffic growth. The poor maintenance of existing roads is another concern. In cities around the world, highly political and wasteful government decision-making has led to excessive traffic congestion that has created long commutes, reduced safety, and caused loss of leisure time. Street Smart examines the privatization of roads in theory and in practice. The authors see at least four possible roles for private companies, beyond the well-known one of working under contract to

design, build, or maintain governmentally provided roads. These include testing and licensing vehicles and drivers; management of government-owned facilities; franchising; and outright private ownership. Two chapters describe the history of private roads in the United Kingdom and the United States. Contemporary examples are provided of road pricing, privatizing, and contracting out are evident in environs as diverse as Singapore, Southern California, and Scandinavia, and cities as different as Bergen, Norway, and London, England. Finally, several chapters
