The producer's guide to harmony, chord progressions, and song structure in the MIDI grid. As an online class, Dr. Allen has had over 50,000 students use this ground-breaking curriculum to learn music theory. Students and Producers who have wanted to learn music theory to improve their own music, but have been intimidated by traditional approaches, music notation, and abstract concepts will find this book to be the answer they have been looking for. From the Author: "How music theory is usually taught is unfair. It starts with the assumption that you can read music and understand the language of classical music. My book leaves all of that behind - focusing only on the MIDI grid that producers are already familiar with to learn all the key concepts of music theory, and ultimately, make better music." This book covers all the fundamentals of music theory, but is written using the language of the DJ and Producer - the MIDI Grid. It includes "analysis" projects that look at the harmonic and melodic ideas in songs by popular producers including Zedd, Boards of Canada, Daft Punk, Deadmau5, Bonobo, Richie Hawtin, Moby, Skrillex, and Aphex Twin. Praise for Music Theory for Electronic Music

Producers: "Aspiring electronic musicians have choices to make when it concerns their own education and training. This text makes one choice much easier: start here and get learning, quickly. Grounded and easygoing, the book uses real-world examples to help you make sense of music's inner workings while steering clear of dense theories." - Michael J. Ethen, PhD Musicologist "This book knocks the oftentimes alienating world of music theory completely onto it's side. Difficult to explain concepts are perfectly demonstrated for the aspiring electronic music producer who might have no formal music training. A must have for all aspiring producers." - James Patrick (DJ, Producer, Educator) Slam Academy, Dubspot, IPR, Ableton Certified Trainer "With Music Theory for Electronic Music Producers, Dr. Allen has produced a remarkable resource: an extensive tour of musical theory that leverages some of our favorite modern tools - the virtual studio and it's piano roll note display. By introducing us to the "why" as well as the "what" of music theory, this book helps us to understand what makes music tick and how to improve our own work. In addition to offering a sound theoretical foundation, the deep dives into analyzing tracks by Skrillex, Aphex Twin, and Deadmau5 keeps our attention focused on real-world production. MTEMP will definitely go on the top of my recommendation list for anyone that needs a fresh view of musical concepts." - Darwin Grosse Director of Education, Cycling '74

(Music Pro Guide Books & DVDs). Here, record producer Beinhorn reveals how to deal with interpersonal issues record producers face when they work with artists one on one or in small groups. The situations and solutions are based upon the author's personal and professional experience working with a variety of different artists, such as Herbie Hancock, the Red Hot Chili Peppers, Soul Asylum, Hole, Soundgarden, Ozzy Osbourne, Courtney Love, Marilyn Manson, Social Distortion, Korn, and Mew. Beinhorn's unique methods and perspective, applied to record producing and music making in the studio, opens the door to successful collaborative efforts. The author shows you how to find what he calls your sensory connection to the creativity process, which ultimately helps you find the intent behind your creative choices. You can read dozens of articles and books that feature a hundred different people talking about what microphones they used when they recorded Record X or how they set their stereo buss compressor, but you will never find out what prompted them to make these choices. Beinhorn's focus on collaborative effort enables record producers and artists to find solutions while working as a creative team. This perspective is especially valuable as it is transdisciplinary and can be applied to many occupations and modes of creativity outside of record production.
