What Your Doctor May Not Tell You About Breast Cancer

John Lee is author of the best-selling What Your Doctor May Not Tell You About Fibromyalgia.

Arguing that giving estrogen replacement therapy to women after menopause is medically the wrong thing to do, Lee suggests that natural progesterone can prevent most of the unpleasant side effects of menopause, including osteoporosis and weight gain.

Each year, over 40,000 women in the U.S. die from breast cancer. With statistics rising, conventional methods of treatment are simply not working, and in some cases may even be harmful. Now, Drs. Lee and Zava explain the potentially life-saving facts, such as: likely sources for the increase in breast cancer, including environment, excessive estrogen, progesterone imbalance, diet, and the dangers associated with traditional hormone replacement methods. Readers will learn strategies for lowering their risk and preventing this devastating disease through a revolutionary hormone balance program.

A groundbreaking program that reveals what really causes heart disease-- and what can be done to prevent and treat its devastating effects on long-term health. Coronary heart disease has long been the number one killer in this country, and for decades, we have been told about five basic risk factors: elevated cholesterol, high blood pressure, diabetes, obesity, and smoking. But the truth is that heart disease is much more complex-- with close to 400 risk factors! In this innovative guide, Dr. Mark Houston helps readers discover the causes of heart disease, how to prevent and treat its debilitating effects via nutrition, nutritional supplements, exercise, weight management, and lays to rest to various myths (cholesterol is not the primary cause) based on scientific studies and medical publications. Readers will also learn how to identify the risk factors most likely to endanger them and construct an arsenal of non-pharmacological preventative strategies that can counteract this most deadly disease.

This is an essential guide for parents about vaccinations. Dr. Stephanie Cave explains their pros and cons and the book provides information to help parents make a knowledgeable, responsible choice about vaccinating their children.

A leading Alzheimer's expert presents a comprehensive program to help prevent and slow the progress of memory loss. There are currently more than four million Americans afflicted with Alzheimer's, and an estimated 14 million will have the disease by 2050. The good news is that everyone can make lifestyle changes to increase the odds that they will live well into old age with their mental faculties intact. Dr. Devi's groundbreaking program can help prevent the disease from developing and slow memory loss in those already suffering from the illness. By taking an active role in the management of the disease and through a combination of medication, natural hormone therapies, mental exercises, cognitive rehabilitation, and nutritional and herbal supplements, it is possible to slow the effects of this debilitating condition and

improve the quality of life.

Depression is a serious illness that can often havedetrimental effects on one's personal and professional life -but it doesn't have to. With proper treatment, one can conquerthis mental monster and lead a fulfilling and productive life.What's more, expensive prescription drugs with sometimesdebilitating side effects may very well not be the answer.In this breakthrough programme, Dr Michael Schachter offers hisproven protocol to treat depression naturally by rebalancing andrepairing out of sync and inefficient neurotransmitters in the brain.Readers are guided towards relief through potent, safe naturalsupplements that directly affect brain chemistry. Combining moretraditional treatments with new proven remedies, Dr Schachter'sprogramme reveals: the right amino acids that can help balance brainchemistry; how to easily and effectively control the amount ofserotonin, dopamine, and glutamine in the brain - without drugs; theimportance of Omega-3 intake and the role of mercury and fluoridetoxicity can play in depression and much more.Dr Schachter leaves no stone unturned on the path to treatingdepression safely, effectively and naturally.

An astonishing 13 million people suffer from hypothyroidism and its complications. This book includes a Foreword by Mary J. Shomon, thyroid patient advocate, published educator, and author of the successful "Living Well With Hypothyroidism."

With the exception of only the common cold, Irritable Bowel Syndrome (IBS) accounts for more work and school absences than any other illness. But drugs aren't always the best option - as Dr. Ash learn from experience. He has developed a program that helps relieve symptoms without drugs - and has applied his knowledge to the treatment of IBS, helping thousands of patients. In this groundbreaking treatment plan Dr. Ash reveals his drug-free approach to relieving the symptoms of IBS, using vitamin C, bioflavonoids, and other herbs and nutrients that help the body to heal itself. He also discusses the role of food allergies; the need for adequate diagnostic tests; and environmental factors, such as stress.

From the series that demystifies disease comes an in-depth look at Glaucoma, a condition that is often misunderstood and is the leading cause of preventable blindness. This book helps to dispel the myths surrounding the disease and inform readers as to the truth about glaucoma. Divided into three accessible sections, the book takes readers through the most common methods of treatment, and explores cutting-edge research and crucial new information on the effects of nutrition, exercise, and herbal medicine on glaucoma.

As well as explaining the mechanisms behind Parkinson's and providing detailed information on its symptoms, diagnosis and conventional treatments, this book includes information on groundbreaking alternative treatments such Dr Perlmutter's glutathione therapy using non-prescription supplements.
